

Instructions for configuring Skype on devices connected to the BLN

The BLN has allowed Skype access for all schools through the Smoothwall Filtering Devices. However, to start using skype you may need to configure the below settings in your skype account to get it to work.

Please Note: Your 'Host' also known as your proxy setting (highlighted in yellow below) is personal to your school. You may be able to find your proxy setting by going onto the internet and going to

Tools

Internet Options

Connections

LAN Settings - Your Proxy settings should be detailed here.

Alternatively, please contact **E-ICT on 01274 385844**
