

## An Introduction to Animation Activity

### Flip Books

### How to Make a Flip Book

1. Cut a piece of thin A4 card into 6 equal pieces.

2. Each book will require about 12 pieces of this card.
3. Number the pages on the back.
4. Think of a short sequence to animate (for example, a kite flying or a child kicking a ball).
5. Draw the sequence on the pieces of card, making each page show the next stage of the story sequence.
6. When you have finished your story, put the pages in order, with page 1 first. Then staple the left edges together.
